1. to map their 250 ecolabelled tourism businesses and travel packages
 2. to inform their tour operators about certificates and certified tourism world wide
 3. to integrate the map of Austria as i-frame into their own website

4. Observatory

OBSERVATORY FOR MAKING TOURISM MORE SUSTAINABLE

Timely and accurate information is the life blood of the knowledge economy, enabling stakeholders to be innovative, competitive and sustainable.

OUR SUPPORT

The DestiNet Portal observatory page provides all stakeholders with information on tourism observatory processes. Following a global to local administrative level structure, users can access tourism statistical information, or add to the observatory content if you wish. There is also a topic observatory section for those interested in information by subject matter rather than territory. You will also find guidance on how to monitor and report on sustainable tourism development in your area.
