**Objectives and MAIN ACTIVITIES**

# What is wool felting?

- One of the oldest handcrafts which dates back even before weaving.

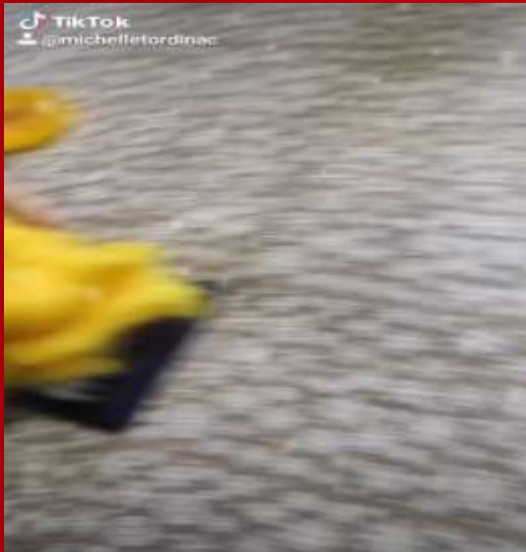

## FELTING TECHNIQUES:

- „DRY FELTING” – picking/ needling strings of wool with special made thin needles. With this technique various shapes can be made in 2d or 3d model.
- „WET FELTING” – uses layers of dry felted wool, which is soaked into water mixed with soap. After wetting, any shape can be made, even smaller clothing items such as hats or scarves.
