

OLIVE TREE

School Applicant: Secondary school Braća Radić Kaštel Štafilić-Nehaj

Partner School: Secondary Vocational School Antun Horvat Đakovo

Ministry of Tourism and Sports, Promotion and strengthening of competences of professional and artistic occupations

january – may 2023

- Student SVS Antun Horvat made ceramic vessels,

- their colleagues from SS Braća Radić planted olive saplings in them.

Hands play the most important role

First there was clay - raw

Multicolored vessels are made from it

Young bonsai olive stems are gradually moving into them

Scissors, some wire and a lot of love

A little help from elementary school students

Our product was presented at the Split-Dalmatia County Festival of Excellence

And in the end it entered the
office and brought with it a
breath of nature and its
peace
